

CALL FOR PAPERS

The 27th International Conference on Analytical & Stochastic Modelling Techniques & Applications (ASMTA 2023) Florence - 20-23 June, 2023

ASMTA and EPEW are flagship conferences for academic and industrial researchers from diverse fields with common interest in the performance modeling, analysis and design of stochastic systems. This year, the two conferences join again (and also join, again for ASMTA, with the International ECMS conference on Modelling and Simulation, ECMS 2023), and solicit papers on the development of broadly applicable analytic, simulation and measurement-based methods on all aspects of performance engineering.

ASMTA 2023 aims to bring together researchers interested in understanding and improving the performance of systems where the flow of information is random by means of proper modeling and solution methods. It seeks papers to promote research results in the development and analysis of stochastic models arising among others in communication systems, manufacturing, production, service operations, supply chain/inventory management, and biological systems.

Its scope includes both methodological and computational advances. In particular, it aims to bring together researchers working on the theoretical, algorithmic and computational aspects of the methods applied in stochastic models, and on the applications of such methods across a broad spectrum of research fields. The conference is particularly interested in contributions that present new performance evaluation methods/algorithms, or that creatively apply existing methods to predict and efficiently design stochastic systems.

The website for ASMTA 2023 and EPEW 2023 is available at <https://asmta2023.sciencesconf.org>, the website for ECMS 2023 is at <https://scs-europe.net/conf/ecms2023/>.

Submission guidelines

Full papers reporting original and unpublished results on ASMTA topics are solicited. Submissions should not be under consideration for publication elsewhere while being evaluated for this conference. The proceedings of ASMTA and EPEW are published in the Springer Verlag Lecture Notes in Computer Science (LNCS) series. Submissions may already be prepared in LNCS format and must not exceed 15 pages, including figures, tables, and references; see the information for authors on Springer as web site for formatting instructions (Springer). Please clearly indicate the corresponding author. Note that authors will be required to sign a copyright release. The paper submission for ASMTA 2023 will only be accepted through the EasyChair Paper Submission System (link will be enabled soon). Only papers written in English, conforming to the LNCS format and in PDF will be accepted for reviewing. Submissions as e-mail attachment will not be accepted. Consistent with standard practice, each submitted paper will receive rigorous peer reviewing. Papers will be selected based on their originality, timeliness, significance, relevance, and clarity of presentation. Submission implies the willingness of at least one of the authors to register and present the paper, if accepted. All

accepted papers in the conference are expected to be presented and will be included in the conference proceedings.

Topics of interest

The topics include but are not limited to the following:

- Performance-Oriented Methodologies:
 - Markov Processes
 - Queueing Systems and Networks
 - Capacity Planning, Resource Allocation, Routing, Scheduling and Quality of Service
 - Branching Processes and Epidemic Models
 - Game Theory and Stochastic Games
 - Reliability Theory
 - (Computationally Intensive) Statistical Methods
 - Stochastic Control, Decision Processes and Optimization
 - Stochastic Process Algebras and Petri Nets
 - Rare Events and Stochastic Simulation
 - Approximations, Bounds and Limits of Stochastic Models
 - Reinforcement Learning Techniques for Dynamic Resource Allocation
 - Fluid and Diffusion Limits
 - Risk Processes
 - Random Graphs
- Envisaged Application Areas:
 - Complex Systems
 - Computer and Information Systems
 - Workflow Management Systems
 - Communication Systems and Networks
 - Wireless and Mobile Systems and Networks
 - Peer-to-Peer Applications and Services
 - Embedded Systems and Sensor Networks
 - Storage Systems, Data Centers, Content Delivery, Cloud/Fog/Edge/... Computing and Virtualisation
 - Workload Modelling and Characterization
 - Road Traffic and Transportation
 - Social Networks
 - Modeling of Virtualisation
 - Energy-Aware Optimisation
 - Stochastic Modelling for Systems Biology
 - Biologically Inspired Network Design
 - Artificial Intelligence and Machine Learning Platforms
 - Blockchains and Crypto-Currency
 - Network Economics and Platform Designs
 - Matching Systems and Sharing Economy

Best Paper award

The ASMTA 2023 committee will select the best paper award of the conference for which a certificate will be presented at the end of the conference.

Important Dates

Paper Submission deadline: April 4th, 2023

Notification of Acceptance: April 24th, 2023

Camera Ready: June 3rd, 2023

Special Issues

A selection of the best papers presented at EPEW 2023 and ASMTA 2023 will be considered for a submission of extended versions to the ACM Transactions of Modelling and Computer Simulation.

General Chair

Mauro Iacono, Università degli Studi della Campania "Luigi Vanvitelli", Italy

TPC Chairs

Enrico Barbierato, Università Cattolica del Sacro Cuore, Brescia, Italy
Salvatore Serrano, University of Messina, Italy

Program Committee

Nail Akar, Bilkent University
Konstantin Avrachenkov, INRIA
Simonetta Balsamo, Università di Venezia
Tejas Bodas, IIT Dharwad
Dieter Claeys, Ghent University
Céline Comte, Eindhoven University of Technology
Koen De Turck, Ghent University
Antonis Economou, University of Athens
Dieter Fiems, Ghent University
Marco Gribaudo, Politecnico di Milano
Irina Gudkova, People's Friendship University
Yezekael Hayel, LIA University of Avignon
András Horváth, University of Turin
William Knottenbelt, Imperial College London
Lasse Leskelä, Aalto University
Martin Lopez Garcia, University of Leeds
Andrea Marin, Università Ca' Foscari Venezia
Jose Nino-Mora, Carlos III University of Madrid
Juan F. Perez, Universidad del Rosario
Tuan Phung-Duc, University of Tsukuba
Liron Ravner, University of Haifa
Marie-Ange Remiche, University of Namur
Jacques Resing, Eindhoven University of Technology
Yutaka Sakuma, National Defence Academy of Japan
Konstantin Samouylov, People's Friendship University
Bruno Sericola, INRIA
Janos Sztrik, University of Debrecen
Miklos Telek, Budapest University of Technology and Economics
Benny Van Houdt, University of Antwerp
Joris Walraevens, Ghent University
Jinting Wang, Central University of Finance and Economics
